

Robinson R-44 TEL-TAIL System

Triple LED Fairing Mounted Illumination Installation

Beneficial in a variety of situations, from the heliport to darkened landing zones to the air, DeVore Aviation lighting systems provide a tangible advantage to the visibility of your helicopter and the safety of your operations. TEL-TAIL lighting fixtures enhance airborne identification by illuminating the entirety of the aircraft, enabling instant recognition in high traffic situations.

Technical Specifications

Input Voltage:	28 VDC
Housing:	Aluminum
Color:	White
Lamp Type:	3x3 watt LED
Power:	18 Watts
Current Draw:	.75 Amps

Mounting locations include the underside of the aft skids. Two assemblies are required per aircraft.

Low Emission Diode (LED) Lighting | Longer Life | Aluminum Housing
